# Product family coverage

Regardless of your business goals, Rockwell Automation support services can help you unlock the potential of your operation. Using the valuable tools packaged with every support agreement and our team of trained experts, you have the ability to reduce maintenance time and costs, and improve your overall equipment effectiveness.

As of October 1, 2019, new perpetual software purchased via the Rockwell Software portal will be sold with a software maintenance contract attached. The software maintenance contract will be co-termed with the TechConnect agreement at the time of sale. Your TechConnect agreement will continue to entitle you to software maintenance support for all software purchased at the time of the agreement; however, it does not include maintenance for any new software purchased during the term of the agreement.
