# ProSafe-PLC to ProSafe-RS Migration

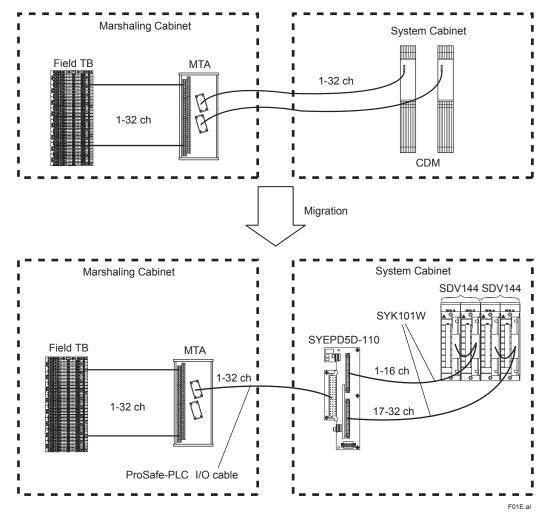

#### GS 32Q06W10-31E

#### **■ GENERAL**

These General Specifications provides the hardware of the Migration Product that is used to replace the ProSafe-PLC controller with the ProSafe-RS Safety Control Station (SCS) in a short construction period using the existing ProSafe-PLC I/O cable, terminal board (MTA), and field wiring.

The figure below shows a configuration example of replacing the Critical Discrete Module (CDM) of ProSafe-PLC with the Digital Input Module (SDV144) of ProSafe-RS.

The following ProSafe-PLC I/O modules can be migrated.

CDM: Critical Discrete Module SDM: Standard Discrete module CDO: Critical Discrete Output Module CAI: Critical Analog Input Module VIM: Voltage Input Module

For the migration of modules other than the above, please consult with Yokogawa Sales Dept.

#### ■ MIGRATION PRODUCT CONFIGURATION

The Migration Product can be used to migrate the module rack to ProSafe-RS while remaining the existing field interface hardware, such as the ProSafe-PLC terminal board. The Migration Product consists of the following components.

- · Migration Adapter for signal distribution
- Migration Cable for connecting migration adapter and I/O module of ProSafe-RS
- · Dedicated frame for installing migration adapter

#### Migration Adapter

The Migration Adapter is used to connect signals from the existing ProSafe-PLC terminal board (MTA) to the ProSafe-RS I/O module via the ProSafe-PLC I/O cable.
